

A Co-citation layer

from the bibliographies —
who is cited together

B Institutional layer

hand-collected careers —
who trained whom, and where

52 of the 553 authors in the co-citation network have a career record; 7 more have one but are cited too rarely to be nodes. C has two advisors: 14 of 44 doctorates are co-supervised.
Both layers describe the same people, so every join runs on author_id.
